Drosal® pro

Trap for capturing Drosophila suzukii

Features

Trap for monitoring and mass trapping of *Drosophila suzukii*, the fruit fly. It consists of a cup container, a perforated lid, and a hook for hanging the trap. It should be baited with approximately 100 ml of the specific attractant Sugarfly, which is based on apple cider vinegar, red wine, sugar, and natural flavors, to be poured inside the cup.

Fields of application

Monitoring and mass trapping of *Drosophila suzukii*. Monitoring: at intervals of 5-10 meters apart along the edges of the cultivated area, and if present, at borders with nearby woods and shrubs. Mass trapping: after capturing the first individual, create a belt of traps around the area, placing one every 2 meters along the perimeter. For fruit trees: 1-3 traps per tree at a height of approximately 1.5-2 meters, alternating in height, preferably on the northeast side.

CONTENT	50 traps and 5 lt of Sugarfly
PACKAGING	Box of 50 pcs + 5 lt of Sugarfly
