super Wood

Aggregation pheromones for capturing bark beetles

Features

Plate dispenser, specifically designed for capturing certain forest bark beetles (*Ips typographus, Pityogenes chalcographus*). To be used in combination with the super Forest trap.

Fields of application

Monitoring and capture of *Ips typographus*, *Polygraphus poligraphus*, *Pityogenes chalcographus*, *Trypodendron lineatum*, *Tomicus piniperda*, *Tomicus minor*. In the first case, place 3-4 traps/ha, in the second case, 12-15 traps/ha. Place the traps at a height of approximately 150 cm from the ground and maintain a distance of approximately 25 meters between them. The pheromone plate must be hung inside, taking care to position it approximately halfway down the trap. It must be installed in the second half of March and the pheromones remain active for 5-6 weeks. Check the trap periodically to keep it clean and record catches.

PACKAGING 1 dispenser
