Sugarfly

Attractant for capturing Drosophila suzukii

Features

Attractant for monitoring and mass trapping of *Drosophila suzukii*, the fruit fly. It is used in combination with Drosal Maxi and Drosal Pro. It is a product based on apple cider vinegar, red wine, sugar, and natural flavors.

Fields of application

Monitoring and mass trapping of *Drosophila suzukii* are essential strategies for effective pest control. For monitoring, it is recommended to place one trap every 15-20 meters along the perimeter. For mass trapping, the distance should be reduced to one trap every 5-10 meters. In case of severe infestations, the spacing between traps should be further reduced to enhance effectiveness. When dealing with fruit trees, the recommended setup is one trap every 5-10 trees for monitoring, while for mass trapping, one trap per tree is advised.

COMPOSITION	Apple cider vinegar Red wine Sugar Natural flavors
HAZARD CLASSIFICATION	The product is not classified as hazardous according to Regulation (EC) 1272/2008 (CLP)
PACKAGING	5 l tank
