ferrex®

Ready-to-use granular slug bait

Features

The slug bait is ready to use and effective against slugs and snails. The active ingredient, iron (III) phosphate, leads to cellular alterations in the goitre and axillary lymph nodes. The slugs stop feeding shortly after ingesting the bait and retreat to their hiding places in the soil, where they die within a couple of days. This prevents direct and indirect damage caused by the decomposition of the slugs on the crop. The special and original lentil formulation allows even smaller slugs to ingest the bait. The product is authorized for use in organic and integrated agriculture.

Fields of application

The product is specific for controlling slugs and snails in all seed crops and fruit in open fields, vegetables in open fields and greenhouses, in public gardens, green areas, parks, and tree-lined avenues. It is harmless to humans, pets, courtyard animals, and beneficial insects.

Reg. Min. Salute: n. 16248 del 05.10.2021

COMPOSITION	Iron (III) orthophosphate: 2.5% (25 g/kg)
HAZARD CLASSIFICATION	EUH210 Safety data sheet available on request EUH401 To avoid risks to human health and the environment, comply with the instructions for use The product is not classified as hazardous according to Regulation (EC) 1272/2008 (CLP)
PRE-HARVEST INTERVAL	Not required
PACKAGING	1 kg bucket - Box of 20 pieces 6 kg bucket 20 kg sack
