

## sulfar®

Antioïd fungicide based on sulphur 45% on proteic carrier

### Features

Formulated with sulfur on a protein support. Its particular formulation makes it extremely adhesive, resistant to wash-off, and with perfect covering action. Unlike other polysulfide-based products, it has low phytotoxicity, allowing winter treatments even near "bud break." Due to its characteristics, it is particularly suitable for use in organic and integrated defense programs.

### Fields of application

The product is used for its anti-oidium function and for its collateral action against powdery mildew, rust, scab, mites, and eriophyid mites, similar to that exerted by common polysulfides.

Reg. Min. Salute: n. 11196 del 05.02.2002

---

#### COMPOSITION

Pure Sulphur (with no Selenium): 45 g (607 g/l)  
Vegetable proteic carrier: q.s. to 100 g

---

#### HAZARD CLASSIFICATION

Warning  
Skin Irrit. 2  
H315 Causes skin irritation  
EUH401 To avoid risks to human health and the environment, comply with the instructions for use  
Under Regulation (EC) No 1272/2008 (CLP), it is recommended to consult the hazards associated with the product in the safety data sheet and to always follow the information provided on the label

#### PRE-HARVEST INTERVAL

5 days on all crops

---

#### PACKAGING

10 kg tank  
- Pallet with 50 tanks

---

Updated: 2026/05
