neemik ten®

Insecticide emulsifiable concentrate based on Azadirachtin

Features

Natural insecticide based on azadirachtin, an active ingredient extracted from the seeds of the tropical plant *Azadirachta indica* (Neem tree). It regulates growth by disrupting the development of insects in their pre-imaginal stages, inhibiting the formation of ecdysone, the main hormone involved in controlling molting; it possesses an appetite-suppressing and repellent action. It acts through direct contact and ingestion. It has a systemic action in the plant, also through root absorption, and is therefore translocated to the aboveground part. The product has a collateral effect on mites.

Fields of application

Selective against beneficial insect fauna, it can be used on numerous agricultural crops. It acts against pests of vegetables, fruit trees, and ornamentals, including aphids, thrips, leafhoppers, cutworms, Colorado potato beetles, and leaf miners.

Reg. Min. Salute: n. 11991 del 09.12.2003

COMPOSITION	Azadirachtin A: 1 g (10 g/l) Co-formulants: q.s. to 100 g
HAZARD CLASSIFICATION	Warning Skin Sens. 1, Aquatic Chronic 2 H317 May cause an allergic skin reaction H411 Toxic to aquatic life with long lasting effects EUH401 To avoid risks to human health and the environment, comply with the instructions for use Under Regulation (EC) No 1272/2008 (CLP), it is recommended to consult the hazards associated with the product in the safety data sheet and to always follow the information provided on the label
PRE-HARVEST INTERVAL	7 days on citrus fruit, strawberry, pepper, lettuce and salad, spinach, chard, parsley, basil, celery, fennel and cabbages (spray use) 3 days on all other crops and for uses in fertigation
PACKAGING	1 l bottle - Box of 10 pieces 5 l tank - Box of 4 pieces
