zinco

Liquid fertilizer based on zinc (EDTA)

Features

It performs a stimulating function in the reproduction of young tissues when combined with formulations based on phosphorus. It is particularly useful in the formation of an abundant root system and in the processes of protein synthesis and tryptophan, a precursor of auxins. Symptoms of deficiency include: fruits with reduced size, abundant fruit drop, slowed growth, and shortened internodes.

Fields of application

Suitable for all tree, extensive vegetable, and floricultural crops. It is recommended to apply it 2-3 times, using 5-7 kg/ha in fertigation and 120-280 g/hl when foliar spraying.

COMPOSITION	Water soluble Zinc (Zn): 5% EDTA chelated Zinc (Zn): 5%
HAZARD CLASSIFICATION	The product is not classified as hazardous according to Regulation (EC) 1272/2008 (CLP)
FORMULATION	Liquid solution
PACKAGING	1 kg bottle - Box of 12 pieces
