Roll giallo/nero

Trap for catching various insects

Features

Trap for the capture of many harmful insects, in open fields or in greenhouses, such as whiteflies, aphids, dipterans, leaf miners, leafhoppers, stink bugs. It consists of a yellow (chromotropic action) or black plastic roll, covered with highly adhesive entomological glue. The large surface allows to capture a wide number of adults, drastically reducing attacks.

Fields of application

Mass trapping of whitefly, aphids, dipterans, leaf miners, leafhoppers, stink bugs. It must be unrolled in the open field at 0.8-1.5 m above the ground and firmly fixed on natural supports or with poles installed at the edges of the system. In the greenhouse, install on the perimeter. It can also be used between the crop rows.

CONTENT	30 or 15 cm x 100 m yellow roll or 30 cm x 100 m black roll
PACKAGING	Box of 6 pcs
