Pheromone trap for the capture of elaterids

Features

Trap for monitoring and capture of elaterids (*A. brevis*, *A. sordidus*, *A. litigiosus*, *A. ustulatus*, *A. lineatus*, *A. sputator*, *A. obscurus*). The large room of the trap device, characterized by a large cap and the easy block inverted cone, allows the capture of numerous specimens over the course of the season, avoiding the entry of leaves or unwanted material. It is easy to assemble and allows a quick replacement of pheromones. The trap must be activated with one or more specific pheromones.

Fields of application

Monitoring of the elaterids *A. brevis*, *A. sordidus*, *A. litigiosus*, *A. ustulatus*, *A. lineatus*, *A. sputator*, *A. obscurus*. 3 traps/ha up to 10 hectares of land. Reduce the number/ha as the surface area increases. In areas with high infections, up to 8-10 traps/ha can be placed, in order to reduce the number of insects drastically.

CONTENT	A capture device and 4 pheromones
PACKAGING	Box of 10 pcs
